FLEET & DRIVER MANAGEMENT

**Driver &  
Grey Fleet Management  
Solutions**

# What's it all about?

The way your fleet operates has changed over the last five years, but are you & your drivers at risk?

Australian and NZ Workplace Health & Safety law treats any vehicle used for work purposes as a 'place of work' - even privately owned vehicles (known as 'Grey Fleet')

Employers have a duty to ensure a 'safe place of work' for their employees & to the general public. Failure to do so can result in criminal charges and large fines

So you may know who is driving your company or pool cars, but you also need to know who else is driving, and how safe they are in their vehicle, to ensure compliance

So how do you ensure you, your drivers and your organisation are covered? Where do you even start....? That is where Plumfleet comes in..we have the tools and expertise to help.

# Who is Plumfleet?

'Traditional' leasing & fleet management companies appeared to only want to finance vehicles...it seemed no one was working to solve the issues involved in operating a modern fleet.....

...we thought the same thing. So we formed Plumfleet - based on our intent to help organisations manage the risks & costs associated with all staff who drive for work purposes...

...and it looks like we've hit the mark. The appetite to manage mobility-related WHS/OHS risks is significant, and growing, as reliance on Vehicle Allowances and Grey Fleet increases across Australia & New Zealand

Plumfleet is Australian-owned-and-operated. We provide our products to customers throughout each Australian State & Territory. We also serve the New Zealand market and will soon open in the UK

Our products are designed to help organisations, and those that drive on their behalf, easily comply with fleet and safety policies & procedures

# ...so you need a Policy?

A set of well written policies & procedures are your organisation's 'front line' when it comes to managing the risks & costs associated with a modern driver community....

...they should be easy to understand, easy to access and clearly spell out the rules and roles relating to drivers, Line Managers & other key stakeholders

Your organisation's policies have a big job to do - they must identify and cover multiple driver types, from tool of trade, pool vehicle, Grey Fleet and even volunteers

They should clearly articulate the requirements of key stakeholders regarding your organisation's WHS/OHS, cost reduction and operational requirements

....whilst also spelling out the 'no go' areas for all stakeholders - including the implications and consequences of non-compliance with your policy

....and most importantly, the people that are subject to the conditions of these documents must accept and abide by them to ensure compliance is met

# ...and what about a System?

There's no point in having top-notch policies and procedures if they can't be 'brought to life'...

....so you're going to need a system that is smart enough to engage your key stakeholders in complying with your policies and procedures

....your system should also be flexible enough to reflect your organisation's structure, differing policy documents and a varied driver community

....not to mention having the smarts to send alerts and reminders to drivers, Line Managers and Administrators when due dates and threshold events occur

Your organisation has safety targets - so your system should fully support Management's reporting requirements regarding your fleet & drivers

....which means your system will need to accommodate your total fleet and driver community - including Grey Fleet vehicles, buses, forklifts etc.

....we couldn't find a system that was capable of delivering these outcomes, so we built our own - 'Plumtree'

# ...tell me about tree

Plumtree is an interactive, cloud-based Driver & Fleet Management tool which facilitates ongoing compliance with your organisation's policies and procedures

The security of data stored in Plumtree is critical. From SSL encryption, two-factor and token-based authentication and local Tier Four data hosting, we take every step to protect data in Plumtree

Plumtree is 'small-screen' enabled and can be accessed via multiple devices including tablets & mobiles. Good for you, easy for your drivers

A comprehensive set of automated reminders and alerts - which target drivers, line managers and system administrators, helps to maintain compliance and also offers a handy audit trail

....and we haven't forgotten how important reporting is. In fact we've gone so far as to ensure we have the ability to produce a virtually unlimited number of reports - provided the data is held in Plumtree

# ...more about tree

Plumtree is designed to automate and integrate key elements of your fleet and safety policies with the most critical element of your mobility strategy - your people. Plumtree offers....

**Policy Review & Acknowledgement**

**Driver Licence and Demerit Point verification & declarations**

**Comprehensive Grey Fleet Vehicle management functionality**

**Eyesight Testing verification**

**Medical Condition verification**

# ...what else does it offer?

Beyond the basics, Plumtree also addresses the more complex elements of your mobility strategy that requires driver engagement....

**Driver Risk Assessment module**

**Interactive Journey Planning**

**Fully-configurable Driver Knowledge Testing**

**Driver Training Module**

**User Activity & Audit Trail**

# ...what about fleet management?

**A full range of fleet expenses, for both company and Grey Fleet vehicles, can be bulk uploaded into Plumtree**

**Plumtree offers comprehensive fuel expense & management reporting capabilities**

**Maintenance, repair & tyre expenses can be bulk uploaded - for your company and Grey Fleet vehicles**

**Plumtree also captures insurance details for your company and grey fleet vehicles**

**Fleet Managers and drivers are able to load and track details via the Accident/Incident Register**

**...and all backed up by Plumtree's comprehensive reporting capability**

# ...and our customers say?

"..we can rely on Plumfleet to provide their products and services and to follow through with ongoing support when it is required..."

"...we have found the experience to be extremely smooth even when considering the difficult issue of grey fleet management..."

"...Plumfleet helps our organisation to monitor our WHS objectives in safe driving. The Plumtree system is suitable for those who need to track and monitor their compliance metrics within Driver and Fleet Management...."

"...Plumtree gives us the tools we need to ensure compliance across the field-force with our policies and procedures. It gives us a visibility that we never had before..."

"...I would recommend Plumfleet to organisations that have a grey fleet, no matter how big or small, one car is enough to put your organisation at risk if you don't have the right system in place to capture all the required data. Any fleet manager who wants to work with a great company that listens to your needs and provides the required outcomes would find Plumfleet an ideal company to talk to..."
